The Legend of Tutuwalu:

Tutuwalu, the Fijian name for the leatherback sea turtle, is a revered and mystical figure in many iTaukei communities. Known for its immense size and rare sightings, this ancient creature is steeped in mystery and respect. Its presence in the ocean is seen as both awe-inspiring and rare, making it a symbol of strength and endurance.

In Fijian oral traditions, Tutuwalu is often described as a wise and ancient traveler—an enduring guardian of the deep sea. Its occasional appearances near the shore are sometimes interpreted as a powerful reminder for people to honor and protect the ocean. While the tales surrounding Tutuwalu may vary across different islands, it is universally seen as a symbol of the ocean's secrets, resilience, and the deep bond between the people and the sea.
